1. Overview

Friink is a software platform that combines community and a service marketplace. Focusing on mental health, it'll provide a platform to interact with professionals and avail their services.

2. Auth

2.1. Signup

As a prospective user, I want to create an account with my email, a unique username, and my date of birth, so that I can securely access the platform.

- 2.1.1. Users can sign up with a unique email address.
- 2.1.2. Passwords must be at least 8 characters long and must include 1 uppercase letter, 1 lowercase letter, 1 special character, 1 number, and no spaces.
- 2.1.3. 6 letter (alphanumeric) OTP will be sent for email confirmation.
- 2.1.4. Username can contain only letters, numbers, '-', '_', '.', and no spaces.
 - 2.1.4.1. Username must be unique.
- 2.1.5. At the time of registration the user must be at least 13 years old based on the date of birth they enter.
- 2.1.6. Location can be left empty at the time of registration.
- 2.1.7. Email will be sent after successful registration.
- 2.1.8. If registration fails due to OTP verification or is left incomplete then the same email will be available to be reused immediately.

2.2. Login

As a registered member, I want to authenticate via my email, password, and a fresh verification code, so that my account remains protected from unauthorized entries.

- 2.2.1. Users can login after registration with their email and password.
- 2.2.2. OTP will be sent on registered email every time a user tries to login.
- 2.2.3. Five consecutive failed attempts will lead to the account being blocked for 3 hours.

3. Users and Profiles

3.1. Default User

As a default user, I want a profile initialized automatically at signup, so that I can interact with the community feed and explore available services.

- 3.1.1. All users are default at the time of registration.

- 3.1.2. Default users can create posts.
- 3.1.3. Default users can like, star, quote, and share posts.
- 3.1.4. Default users can request service.
- 3.1.5. Default users can like, star, and share services.

3.2. Professional

As a default user who is a mental health practitioner, I want to apply for professional verification, so that I can unlock a verified badge and host services.

- 3.2.1. A default user can get verified to become a professional.
 - 3.2.1.1. In order to get verified they'll have to;
 - 3.2.1.1.1. Enter their legal full name.
 - 3.2.1.1.2. Provide a short introduction for the reviewer.
 - 3.2.1.1.3. Submit supporting documents.
 - 3.2.1.2. The application to become a professional must be reviewed by a human moderator.
- 3.2.2. Upon verification a verified badge will be given to a professional user.
- 3.2.3. Professional users have all the access given to default users, in addition they can also create services.
- 3.2.4. Professional users will have to set their location.

4. Feed

4.1. Home

As a logged-in user, I want to view a personalized main homepage timeline, so that I can see relevant community posts.

- 4.1.1. Posts from all users will be shown based on user profile and interactions.

4.2. Connections

As a network-focused user, I want a separate feed stream dedicated exclusively to my circles, so that I don't miss updates from people I choose to follow.

- 4.2.1. Posts from followers and following will be shown here.

5. Post

5.1. Create

As a community member, I want to compose text and attach media updates, so that I can share my thoughts with the network.

- 5.1.1. Any user can create a post.
- 5.1.2. A post can have 512 characters.
- 5.1.3. Users can attach media that must be compressed at the time of upload.
- 5.1.4. Limit upload to 16 files max.

5.2. Quote

As a user responding to content, I want to quote another person's post, so that I can add my own commentary alongside their original text.

- 5.2.1. Using the quote button a user may create a quoted post.

5.3. Share Internal

As an active chatter, I want to forward public posts directly into private chat threads, so that I can discuss them with connections

- 5.3.1. Users can share posts via chat.

5.4. Share External

As a creator, I want to share posts outside the platform using a deep link, so that external audiences can discover my content.

- 5.4.1. Users can share posts externally via link.
- 5.4.2. Share external will only be available if a user allows external sharing.
- 5.4.3. By default external sharing will be turned on.

6. Search

6.1. Global

As a user looking for specific items, I want a universal global keyword search engine, so that I can find matching accounts and post entries.

- 6.1.1. Global search is available to every user.
- 6.1.2. The search tab will let users search for other users.
 - 6.1.2.1. Users can search using part of usernames and names.

- 6.1.3. The search tab will let users search for posts.
 - 6.1.3.1. Users can search for posts using phrases from posts.
 - 6.1.3.2. The search result can include results from users that don't have the search phrase in their post but in their username.

6.2. Directory

As a user seeking professional care, I want to browse structured directories of practitioners and options, so that I can evaluate them based on location and performance.

- 6.2.1. Users can access the directory from the side drawer.
- 6.2.2. The Professionals tab will show professionals.
 - 6.2.2.1. Professionals will be sorted based on rating and location.
- 6.2.3. The Services tab will show services.
 - 6.2.3.1. Services will be sorted based on professional rating, connection status, and location.

6.3. Starred

As an organized user, I want to view my saved items, so that I can recall vital data.

- 6.3.1. Users can access starred items from their side drawer.

6.4. Chat

As an organized user, I want to query specific conversations, so that I can recall vital data.

- 6.4.1. Users can search for users and phrases in chat from messages.

7. Chat

7.1. Messages

As a private communicator, I want to trade direct text and rich multimedia messages with others, so that I can discuss topics privately.

- 7.1.1. Users can send text messages.
- 7.1.2. Users can attach pictures, audio, and video files.
 - 7.1.2.1. The same data rules as post will be applied to attachment.

7.2. Call (Out of Scope)

As a user needing real-time interaction, I want to launch voice or video calls inside a private message thread, so that I can speak with connections directly.

- 7.2.1. Users can initiate a call from within chat.
 - 7.2.1.1. Calls can be audio and video.
- 7.2.2. Users can share video while in a call to make it a video call.
 - 7.2.2.1. The user on the other side will get a prompt to convert a call into video call.
- 7.2.3. Video calls will be used for service requests.

7.3. Updates

As a customer tracking orders, I want automated transaction logs sent inside my chat threads, so that I can track system changes easily.

- 7.3.1. Some service request notifications will be sent via chat for redundancy.

8. Connections

8.1. Followers

As a social networking user, I want a dual-handshake follow request pipeline, so that I can safely control my personal circle.

- 8.1.1. A user will be added to followers once they receive and accept a follow request.

8.2. Following

As a social networking user, I want a dual-handshake follow request pipeline, so that I can safely control my personal circle.

- 8.2.1. A user will start following another user once their follow request is accepted.

9. Service

9.1. Create

As a verified practitioner, I want to construct detailed service offerings, so that default users can purchase them.

- 9.1.1. Professionals can make services.
- 9.1.2. A service must have a title of not more than 128 characters.
- 9.1.3. A service can have a description of not more than 256 characters.

9.2. Request

As a client, I want to submit formal service applications with attached notes, so that the provider can review my case.

- 9.2.1. Any user can request service.
- 9.2.2. Users can attach a note called "Request" while requesting.
 - 9.2.2.1. The note must not be more than 1024 characters.
- 9.2.3. The request will have "New" status while it's created and not opened. (Out of Scope)
- 9.2.4. Once the provider opens the request it's status will be updated to "Opened". (Out of Scope)
- 9.2.5. The professional can accept service, suggest another time, or decline. (Out of Scope)
 - 9.2.5.1. The status if accepted will be "Accepted". (Out of Scope)
 - 9.2.5.2. The status if another time suggested will be "Pending". (Out of Scope)
 - 9.2.5.3. The status will be "Declined" and then "Closed" if declined. (Out of Scope)
- 9.2.6. Upon time agreement a payment link will be sent to the requester via email, chat, and notifications. (Out of Scope)
- 9.2.7. Upon payment an event will be created and shown in the calendar to both provider and subscriber. (Out of Scope)
- 9.2.8. If a request is declined and closed the user will get notified via email, chat, and notifications. (Out of Scope)
- 9.2.9. Once the request is closed after being accepted, the provider will be able to add notes not more than 1024 characters. (Out of Scope)
- 9.2.10. Once the request is closed after being accepted, the user will get an option to download details in a PDF file or share details both internally and externally via a link. (Out of Scope)

9.3. Event (Out of Scope)

As a participant, I want a clear record of my scheduled video sessions, so that I can monitor my treatment history.

- 9.3.1. An event will be created after successful payment.
- 9.3.2. The event will be a video call scheduled in the calendar.
- 9.3.3. If both participants miss the event, they will get an option to mark it done or request reschedule.
- 9.3.4. No refund will be offered in case of missing the event.
- 9.3.5. Refund policy? Tech issue?

9.4. Tracking (Out of Scope)

As a participant, I want a clear record of my scheduled video sessions, so that I can monitor my treatment history.

- 9.4.1. Request history will be saved and accessible in the service requests page for every request.
- 9.4.2. In addition to statuses defined in 9.2, additional status will be;
 - 9.4.2.1. Event, when event is started either by provider or subscriber.
 - 9.4.2.2. Once both participants leave the event, the status will change to closed.

9.5. Feedback

As a consumer, I want to rate my completed sessions, so that I can share my experience with the community directory.

- 9.5.1. Once an accepted request is closed, the subscriber will be asked to give feedback via notifications.
- 9.5.2. The feedback will have an option to rate service and add comments, not more than 512 characters.

10. Calendar (Out of Scope)

10.1. Month View

As a scheduled user, I want a clean, interactive month view calendar grid, so that I can track my upcoming sessions.

- 10.1.1. The calendar will be the primary method to view events created upon service request acceptance.
- 10.1.2. Users will be able to jump to dates using the calendar.

10.2. Events

As a scheduled user, I want a clean, interactive month view calendar grid, so that I can track my upcoming sessions.

- 10.2.1. The calendar will show a scrollable list of all events below the month.
 - 10.2.1.1. The list will default to the nearest upcoming event.
- 10.2.2. Events will have a video call link embedded in the join button.

11. Notifications

11.1. Push

As a user, I want to receive real-time push alerts for social interactions and vital account updates, so that I can stay engaged with the platform.

- 11.1.1. Users will be notified for;
 - 11.1.1.1. Likes on their posts.

- 11.1.1.2. A user quotes their post.
- 11.1.1.3. Comment on their post.
- 11.1.1.4. Update on their service request. (Out of Scope)
- 11.1.1.5. 15m before an event. (Out of Scope)
- 11.1.1.6. Follow request.
- 11.1.1.7. Someone unfollows them.
- 11.1.1.8. Service request. (Out of Scope)
- 11.1.1.9. Profile verification.
- 11.1.1.10. Professional status revoked.
- 11.1.1.11. Someone tries to login with their credentials.
- 11.1.1.12. Successful login on another instance.
- 11.1.1.13. Notes added to service request. (Out of Scope)
- 11.1.1.14. Service feedback. (Out of Scope)
- 11.1.1.15. Payment link generated. (Out of Scope)
- 11.1.1.16. Payment successful. (Out of Scope)
- 11.1.1.17. Failed professional verification.
- 11.1.1.18. Event created. (Out of Scope)
- 11.1.1.19. Password updated.
- 11.1.1.20. Payments and subscriptions.

11.2. In App

As an active user, I want a centralized native notification center, so that I can view all system alerts directly inside the app interface.

- 11.2.1. All the push notifications.
- 11.2.2. In addition to push notifications;
 - 11.2.2.1. On the day of an event. (Out of Scope)

11.3. Email

As a user, I want to receive formal email logs for critical profile and security milestones, so that I have a permanent transactional record.

- 11.3.1. Users will be notified for;
 - 11.3.1.1. Successful registration.
 - 11.3.1.2. Login attempt.
 - 11.3.1.3. Successful login.
 - 11.3.1.4. Service request creation. (Out of Scope)
 - 11.3.1.5. Service request update. (Out of Scope)
 - 11.3.1.6. Payment link created. (Out of Scope)
 - 11.3.1.7. Payment successful. (Out of Scope)
 - 11.3.1.8. Professional verification.
 - 11.3.1.9. Failed professional verification.
 - 11.3.1.10. Professional status revoked.
 - 11.3.1.11. Event created. (Out of Scope)
 - 11.3.1.12. Password updated.
 - 11.3.1.13. Payments and subscriptions.

11.4. Chat

As a user, I want to receive updates via chat for critical service updates, so that I'm in sync with my service provider.

- 11.4.1. Users will be notified for;
 - 11.4.1.1. Service requests. (Out of Scope)
 - 11.4.1.2. Payment link. (Out of Scope)
 - 11.4.1.3. Event started. (Out of Scope)

12. Settings

12.1. Profile

As a user, I want to update my basic profile information and security handles, so that my account remains accurate and personalized.

- 12.1.1. Users will be able to update;
 - 12.1.1.1. Name.
 - 12.1.1.2. Handle.
 - 12.1.1.2.1. Once every 24 hrs.
 - 12.1.1.2.2. OTP verification required.
 - 12.1.1.2.3. The older handle becomes available to other users after 24 hours.
 - 12.1.1.2.4. Can revert to the older handle within 24 hours without OTP verification or can change back once it's available after the grace period.
 - 12.1.1.3. Profile picture.
 - 12.1.1.4. Date of birth.
 - 12.1.1.5. Email.
 - 12.1.1.5.1. OTP verification required.

12.2. Professional Status

As a verified professional, I want to toggle my professional visibility status on or off, so that I can control when I am actively taking clients.

- 12.2.1. Professional will be able to;
 - 12.2.1.1. Turn on or off their professional status.
 - 12.2.1.1.1. OTP verification required.

12.3. Security

As a user, I want to update my account password securely, so that I can keep my account protected.

- 12.3.1. Users will be able to update;

- 12.3.1.1. Password.
 - 12.3.1.1.1. Must enter the existing password.
 - 12.3.1.1.2. Must meet password criteria.
 - 12.3.1.1.3. OTP verification required in case of forgotten password.
 - 12.3.1.1.4. The new password cannot be the same as the current or last two passwords.

13. Payments & Subscriptions

13.1. Professional

As a verified professional user, I want to manage my monthly subscription and understand the grace period limits, so that I can maintain my business presence or seamlessly recover it after a lapse.

- 13.1.1. A fixed fee of USD 5 after being verified for 1 month.
 - 13.1.1.1. All payments to be processed via an external link on Friink website.
 - 13.1.1.2. Automatic payment toggle will appear every time the user pays manually.
- 13.1.2. Subscription will be cancelled after 7 days of non payment.
 - 13.1.2.1. Professional status will be disabled.
 - 13.1.2.2. Users can resubscribe within 90 days without verification.
 - 13.1.2.2.1. After 90 days verification data will be marked as outdated and the user will have to use the verification flow again.
